PROFILE

In 2019, I enrolled in Istanbul Okan University with 100% scholarship. After completing the preparatory and first year at Okan University, I transferred to Marmara University in 2021 and graduated from the computer engineering department in June 2024. I am developing my skills in software development and data science. I have been producing content on social media since 2020. I am also an author. I have completed five books and am writing my sixth book. I share my book content on my blog website. I am eager to learn, ambitious, talkative. Expressing myself well, being patient and creative are some of the qualities that my identity as a writer gives me.

EDUCATION

MARMARA UNIVERSITY

Computer Engineering Student

Istanbul

2021 – 2024

- GPA: 3.35
- Graduation Project: Improving Customer Experience with Intelligent Order Management and Data Mining Techniques in Restaurant Businesses

ISTANBUL OKAN UNIVERSITY

Computer Engineering Student

Istanbul

2019 – 2021

- English Preparatory School and First year at computer engineering

COMPETITION EXPERIENCE

TUBITAK

Regional Finals | Biology

2017

TEKNOFEST

Finalist at "Technology for Humanity" category in 2018.

2018-2019

Finalist at "Technology for Humanity" and "Unmanned Underwater Vehicle" categories in 2019.

TUBITAK

Research project supported in 2209 competitions

2023

WORKING EXPERIENCE

SOFTWARE DEVELOPER

MATRIKS FINANSAL TEKNOLOJILER

May 2024 – Present

- Develop and maintain .NET-based desktop applications for financial market data analysis and trading platforms using WPF and C#.
- Design and update application interfaces for financial data visualization and market analytics tools, enhancing user experience through modifications in XAML files.
- Contribute to the development of real-time financial data processing systems that deliver market information from Borsa Istanbul, NYSE, Nasdaq, and other global exchanges.

INFORMATION TECHNOLOGIES INTERN

DOĞUŞ YAYIN GRUBU

October 2023- February 2024

- Resolved software and hardware issues for end users and managed Sentinel One installations.
- Assisted in network operations including switch replacements, port definitions.
- Performed system backups and tested virtual machine installations and definitions.
- Worked on Active Directory for user management, including password resets and account unlocks.
- Participated in cybersecurity activities, learning about threat detection, confirmation, and prevention processes.

BUSINESS ANALYST INTERN

ESIGORTAN

July - August 2023

- Managed and monitored technological processes during the development of the Sigorta7 website.
- Tested and reported errors in web services, followed up on resolution processes.
- Analyzed database management systems and conducted API tests.

DATA SCIENCES INTERN

IFS TURKIYE

July - August 2022

- Received SQL training and managed database tables using IFS Developer Studio.
- Performed table associations, data retrieval, and query combinations using Developer Studio and PLSQL.
- Completed a project for the "Magnolia Book Store" data input-output system and designed related reports.

SKILLS & PERSONAL
